

## Instructions for Adaptor H - (Adapts EM3.5 or EM5 Series boxes to RCA/Power/Trigger)

Please see the diagram below for an explanation of how the adaptor breaks out in to various parts. It is likely that you won't need all the wires/connectors that are supplied. This break out covers most arrangements needed.

**!!! IMPORTANT NOTE - DO NOT IGNORE !!!**

**If you do not connect the RED wire, GREEN WIRE or the DC CONNECTOR you MUST INSULATE THEM. If you do not, these will be live and could cause damage if they touch something they shouldn't!**
